

18 ROSE MESHKOFF: I'm Rose Meshkoff and I've  
19 been a resident of Inyo for 18 years, of Lone Pine.  
20 I'm against it. For one thing, the earthquakes  
21 bother me, earthquakes. It says here, I'm looking at  
22 components of the system, but as you all know,  
23 earthquakes happen miles in the earth. It's down  
24 below. It doesn't happen on the surface, it goes  
25 down below. And that scares me.

1 I have four sons and three grandsons that  
2 live in Vegas, and I live here. And it just -- it  
3 scares me. They had a fire in a tunnel on the  
4 outskirts of L.A. just a couple of months ago. They  
5 couldn't control it. They couldn't put it out. What  
6 would happen if that was a nuclear, if they were  
7 carrying nuclear components?

8 I don't know, it just scares me. We have no  
9 business doing this. We are jeopardizing our  
10 children, our grandchildren and their children. And  
11 I just -- it worries me, it really does. Thank you.
